FACIAL AESTHETICS | PICO CARE 450® TATTOO REMOVAL

# PICOCARE 450 - 1st and only machine in SOUTH AFRICA!

---

**PICOCARE 450 is a US FDA approved** Picosecond Nd:YAG Laser that is used for removing tattoos, as well as treating a wide range of pigmentary disorders, scars, stretch marks, large pores and wrinkles.

While picosecond lasers themselves are relatively new, the PICOCARE 450 is a second-generation Nd:YAG picosecond laser, and the first - and currently only - FDA-cleared laser system that can emit pulses of four different wavelengths (most other picosecond devices can only emit up to two).

It is one of the most advanced laser systems with innovative technology for faster results. It has obtained all the necessary certificates of all the prominent authorities worldwide such as USA FDA, Korea Food and Drug Administration, European CE and has been certified as a stable and highly efficacious system by all the agencies.

## **WHY CHOOSE PICOCARE:**

- Suitable for all skin types – Fitzpatrick I to VI
- Faster visible results
- Clinically proven results
- Negligible to minimal downtime
- Less number of sessions required
- Optimally targets only the pigment to be removed
- Minimal damage to the surrounding healthy tissues

# TIXEL®

---

Tixel® is powered by TMA™ (THERMO-MECHANICAL ACTION) technology. It is the only fractional skin resurfacing device to transfer thermal energy directly to skin – by conduction, the most effective form of heat transfer. Heat is applied to the skin by a medical-grade in situ self-sterilizing titanium tip, triggering the natural healing and skin rejuvenation processes. Tixel produces similar injuries and results to fractional CO2 lasers. However, Tixel leaves no char or debris on the skin and has relatively less downtime for a similar end result. We are able to treat wrinkles and fine lines, active acne, including acne rosacea, skin discoloration and age spots, scars including acne scarring and DED (Dry Eye Disease). Ablative and non-ablative treatments available.

# BIO REVITALISATION PEEL - Non invasive

---

Ground breaking treatment that consists of combining trichloroacetic acid (TCA) with hydrogen peroxide (H<sub>2</sub>O<sub>2</sub>) at a very precise pH level. The two substances interact at a cellular level, providing previously unseen benefits for the skin, and, most importantly, without causing caustication to the skin. With PRX-T it is possible to harness the powerful biostimulating action of TCA with minimal to no exfoliation.

# NEEDLELESS

---

Through the use of Needle-free technology combined with Fusion Meso, an international market leading aesthetic cosmeceutical company, we are able to inject into the desired layer of the skin to fight the signs of aging, treat various skin conditions, change your skin on a cellular level and allow your skin to heal within. Overtime, your skin will slowly utilize the nutrients injected to reverse the signs of ageing. Needleless slimming injections dissolve stubborn localised fat deposits targeting deeper layers underneath the skin. This procedure is specifically meant for areas of fat that are resistant to the effects of weight loss through healthy dieting and exercise.

# X-WAVE TREATMENT

---

The X-Wave treatment works by using medical acoustic waves to break down fat under the skin. The device stimulates lymphatic drainage to remove excess fat materials and toxins from the body. It also aids in collagen production for skin that appears smoother, healthier, and more youthful. The acoustic wave vibrations physically break down fat by activating fat cells which cause them to become more permeable. Lipids are then able to leave the body more easily through the lymphatic system.
